

High School Students!

Explore TCD as a potential elective in your junior and senior year.

Use this postcard to sign up.

TCD
TECHNOLOGY CENTER
OF DUPAGE

TCD gives you the edge to excel in today's competitive world. See inside for elective programs.

Staying ahead of the competition is tough—on campus or on the job. To succeed you need skill, experience, and the confidence to keep up with a rapidly changing world.

As an elective choice during your junior and/or senior year, Technology Center of DuPage will give you the tools to succeed while you are still in high school. By the time you're ready for college or that first job interview, you could have up to two years of hands-on experience in a specific program such as Multimedia and TV Production, Electronics and Pre-engineering Technology, Medical and Health Care, Automotive, Fire Science, Construction, Culinary Arts, and more.

TCD's accelerated hands-on programs are offered half days Monday through Friday at our Addison campus.

Depending on your program, you can earn college credit, apply for scholarships, or intern with one of our business partners.

It's all up to you! Want to take control of your future? Sign up today for the Explore TCD Field Trip and see all TCD has to offer.

Yes, I'd like to explore the possibilities. Sign me up for the Explore TCD Field Trip. (Your Field Trip date is posted on the front of this postcard.) **I understand that I will miss about a half day of regular classes as I travel by bus to the Technology Center of DuPage campus in Addison. Visit our website at tcdupage.org for full program descriptions.**
