

## Thank you, Business Partners!

Every year, area business partners provide internships, job shadows, and other work-based learning experiences for Technology Center students. In addition to building strong student résumés and portfolios, these networking experiences help students see the range of career paths possible in a given field. If you or a company you work for could provide some type of work-based learning experience, contact **Sheryl Palicki at 630.691.7600**. Here is a roster of business partners for the 2008-09 school year:
