

Without cameras: no TV. Without production crews: no movies, no videos. Camera operators and post-production artists are the people who bring the programming we watch every day to the screen.

Be the talent that drives today's entertainment industry.

Multimedia & TV Production

What goes on behind the camera? Lighting, staging, filming, editing, and post-production make today's multi-billion dollar entertainment industry possible. From local news and commercials to multimedia presentations and movies—if you see it on the screen, camera operators, editors, and other production specialists made it happen!

What will my classes be like?

You will go behind the scenes of the entertainment industry, learning trade secrets in computer editing, digital video, digital audio, multi-track recording, set design, studio lighting, and video graphics. Work as part of a production team using state-of-the-art software and technology in Multimedia's private studios. Get ready for an exciting career in video and audio production.

Estimated program cost:

\$150 - **\$165** first year
\$65 - **\$75** second year

college credit available
